-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-21, drawn to a method, classified in class 216, subclass 26.
 - II. Claims 22-24, drawn to a substrate, classified in class 428, subclass 688.
 - III. Claims 25-34, drawn to a transmission screen, classified in class 359, subclass 443.
 - IV. Claims 35-36, drawn to a projector, classified in class 353, subclass 30.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01).
3. Invention I is drawn to a method of etching, which is not the subject of the other inventions in II-IV. The method of etching has many other applications, unrelated to a transmission screens or a projectors.
4. Invention II is drawn to a method of etching a substrate, which is not the subject of the other inventions in I, III-IV. The substrate has many other applications, unrelated to a transmission screens or projectors.
5. Invention III is drawn to a method of etching a substrate, which is not the subject of the other inventions in I-II, IV. The method of etching and the substrate have many other applications, unrelated to transmission screens or projectors.

Art Unit: 1765

6. Invention IV is drawn to a method of etching a substrate, which is not the subject of the other inventions in I-III. The method of etching and the substrate have many other applications, unrelated to transmission screens or projectors.

7. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper. Moreover, the inventions have acquired a separate status in the art as shown by their different classification, and the search required for Invention I is not required for Inventions II-IV; the search required for Invention II is not required for Inventions I, III-IV; the search required for Invention III is not required for Inventions I-II, IV; the search required for Invention IV is not required for Inventions I-III; and thus restriction for examination purposes as indicated is proper.

8. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

9. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
